www.kubot.dev

Former project manager looking for a new challenge to create world-class applications. After learning the basics of front end programming I am looking for an opportunity where I can grow and develop my skills, bring my experience and use it for the benefit of all.

Skills

HTML   SASS   Figma   CSS   Vue.js   EasyProject   Javascript
Three.js   Git   Typescript   Vite

Experience

feb. 2023 - recent

Hexie
Color generator that helps designers to find a combination of colors that will support the identity of a brand by generating a hexcode of the color according to the given input e.g. face, f1, bad...
Technology used: **Vue.js, Typescript**

F1 explore car
As a F1 fan i wanted to create a site where user can interact with 3d model of a f1 car and see what elements are f1 car built from with a little technical details. In addition i made a list of current drivers and a list of a few race tracks
Technology used: **Vue.js, Javascript, Three.js**

Personal portfolio
My first project built to present my work online. Made with mobile first principles in mind.
Technology used: **HTML, SASS, Javascript**
